

## Sealing Devices and Systems

SealingLife Technology designs, manufactures & assembles sealing devices, sealing systems, custom cut overlays, panels and miscellaneous materials. Products we produce and support are made to contain, conceal, shield, protect, isolate and dampen. Examples of these products include cockpit interior and paneling assemblies, Fairlead Blocks, seals, gaskets & packing, machined components and tools, enclosures, panels and material overlays. Through innovative problem solving, we are able to take on challenging projects that include manufacturing working with varying materials and integration of technology. Built on helping others succeed - SealingLife is committed to producing new and legacy products with exceptional quality and on-time delivery.

## Core Competencies

- Custom Mixing & Molding of Rubber and Composite Materials
- Contract Manufacturing & Assembly
- Part Fabrication and Rework
- Die and Die-less Cutting
- Reverse Engineering of Legacy and Obsolete Parts
- 3D Printing of Functional Prototypes & Assembly Jigs
- Quality Support Services (i.e., Control, Inspect)

### Secondary Operations

- Integrated Systems- Hardware/Software
- Vulcanizing/Splicing & Bonding
- Cutting, Grinding & Sanding
- Sewing & Stitching
- Machining, Welding and Tool Making
- Part Modification and Sub-Assembly
- Warehousing, Fulfillment, Packaging and Transporting (Logistics)

## Differentiators

- Experts in the areas of Material Fabrication and System Integration
- Quality Certifications - AS9100D and ISO 9001:2015 Certified
- One-stop-shop for innovative solutions and small business supplier collaborative network
- Standardized quality compliance amongst a network of suppliers that support multiple secondary operations and value-added services.
- Majority of all processes are setup/configured to be performed in-house to control on-time delivery
- Exceptional quality and quick turn-around time
- Broad range of material cutting capabilities with high precision
- Reverse engineering- replicate old/obsolete components and assemblies
- Design & build equipment customized to address unique customer needs.
- Prototyping capabilities which include functional 3D printed prototypes
- Dedicated Research and Development in the areas of Advance Materials and Structure Design
- Ability to house, package and ship items for Just-In-Time delivery with approximately 120,000 sq-ft of warehouse space and a fleet of 30 trucks and trailers
- Multiple office, manufacturing and warehousing locations within the USA

## Company Data

**POC:** Danette J. Wilder - President & CEO

**Sales Office & Lab:** 1141 Red Mile Rd. - Ste. 201, Lexington, KY 40504

**Manufacturing:** 791 Enterprise Dr., Lexington, KY 40510

**Phone:** (859) 977-6640 | **Fax:** (859) 977-6644

**Incorporated in 2008, Lexington, KY**

**NAICS:** 339991  
326291  
323111  
336413  
492110  
541420  
541512  
541614  
541715  
423840

### Socio-economic Data

- Small Disadvantaged Business (SDB)
- Disadvantaged Business Enterprise (DBE) certified by *Kentucky Transportation Cabinet*
- Women-Owned Business (WOB)
- Minority Business Enterprise (MBE) certified by *Tri-State Minority Supplier Development Council*

**Quality Standards:** AS9100D / ISO 9001:2015 / Full Design Certified

## Past Performance

- Elastoseal, Inc.
- Naval Surface Warfare Center
- Flerov Lab of Nuclear Reactions
- General Dynamics/C4 Systems
- Baxter Pharmaceuticals
- Florida Power & Light
- Ligo Hanford Observatory
- Hernandez Piping
- Lindab
- Apollo Engineering3D
- 3DCalz
- Parker Hannifin
- DLA Land and Maritime
- CSRA, Inc. (Raytheon)
- Summit Aviation
- Intellipak, LLC (True Manufacturing)
- United Distributors
- Cooper Bearing
- Hawkins Industrial Resource Co.
- Space Tango
- Flowserve
